

THE LANGUAGE **CAN BE** CHANGED
BUT
NOT THE ACTIONS.

COVID-19

PRECAUTIONS

3°B SIA

Coronavirus

speaks any language, so it moves easily to other countries...

But it doesn't receive welcome words...

It's a **killer**...

There is only one way to protect against it...

We must take the same precautions worldwide.

The most important precaution is washing your hands

Follow these steps:

1. Wet your hands with warm water, apply liquid soap and rub in a circular direction

2. Rub the palm of your right hand on the back of your left and vice versa

3. Rub your palms together intersecting your fingers

4

4. Rub the inside of your fingers together with your hands clenched

5

5. Rub in a rotational direction, grasping the right thumb with the palm of the left hand and vice versa

6

6. Rub the palms of your hands in a circular motion

New Coronavirus COVID - 19

**When coughing or sneezing
you MUST cover your mouth
and nose with the flexed
elbow or a tissue.**

**This is to avoid the spread of
saliva droplets which are contagious.**

**Cover your
nose and mouth
with a tissue...**

**...or a flexed
elbow.**

After using a tissue you must throw it in a closed bin.

Please don't reuse it and always clean your hands with soap.

If you have a fever, cough or difficulty breathing, stay at home, consult a doctor immediately and share your previous travel history with him.

Simona Galeotti - Roberta Melluso

GOING OUT WITH MASKS AND GLOVES, ONLY IN CASE OF NEED: TO THE SUPERMARKET, TO WORK OR TO THE CHEMIST'S

In this period it is essential to stay at home. We are only allowed to go out for emergency, such as going to the pharmacy and supermarket. We must wear masks and gloves. They are used to protect us and others from the virus and avoid contagion; these are the right precautions to save our lives.

Social Distancing

The best way to
prevent this
pandemic

Social distancing

- Social distancing is helping the world to **stop the spread of the Coronavirus**.
- keep a distance of 2 metres from others and avoid gathering together in large groups.

Keci Rafman – Moschino Francesco

The **World Health Organization (WHO)** is a specialized agency of the United Nations responsible for international public health and its main objective is ensuring "the attainment by all people of the highest possible level of health". The WHO's broad mandate includes advocating for universal healthcare, monitoring public health risks, coordinating responses to health emergencies, and promoting human health and well being. It provides technical assistance to countries, sets international health standards and guidelines, and collects data on global health issues through the World Health Survey.

Recommendation to stay at home

In the previous slides we have seen some of the precautions useful to prevent the contagion, but the best way is to stay at home ; we must go out only once a week to do the shopping or for supplies. We must do it for our safety and everyone's

#StayAtHome!
